

POSITION DESCRIPTION

Position Title:	Application Development Team Leader
Cluster / Business Unit / Division	Information Technology
Section or Unit:	Development & Analytics
Classification:	Band 7
Job Family:	ICT & Digital Solutions
Position Description Number:	PD-0467
Work Contract Type:	Professional
STEMM/NON-STEMM:	STEMM

POSITION PURPOSE

Provide project leadership and technical mentoring capability to the team whilst contributing to the overall direction and strategy required to maintain best practice in the Development & Analytics team. This position will be required to act in the capacity of Development & Analytics manager when required.

ORGANISATIONAL ENVIRONMENT

ANSTO leverages great science to deliver big outcomes. We partner with scientists and engineers and apply new technologies to provide real-world benefits. Our work improves human health, saves lives, builds our industries and protects the environment. ANSTO is the home of Australia's most significant landmark and national infrastructure for research. Thousands of scientists from industry and academia benefit from gaining access to state-of-the-art instruments every year.

Information Technology is dedicated to enhancing and maintaining ANSTO's digital facilities for operational reliability and providing a range of customer services to support ANSTO's research, business activities and projects. The IT Support unit is responsible for day to day IT service delivery, support and the execution of large capital projects.

The Development & Analytics team is responsible for development standards, practice, maintenance and delivery of a wide variety of solutions. As part of Development & Analytics, you will be high performing team player that embraces best practice in order to deliver positive outcomes to the greater organisation in a safe, secure and sustainable manner.

ACCOUNTABILITIES & RESPONSIBILITIES

Key Accountabilities

- Provide leadership and mentoring capability to junior staff within Development & Analytics.
- Build and maintain-support a portfolio of applications and solutions (such as existing bespoke, legacy and COTS applications).
- Engage with new techniques and processes throughout industry and adapt techniques to create new solutions for ANSTO.
- Receive business requirements and where appropriate develop new solutions, guiding the team in implementing bespoke solutions for ANSTO's unique requirements.
- Review existing solutions available to ANSTO, and whether it is appropriate to buy off an off the shelf tool to meet business needs or take ownership of creating a new solution for the business – guiding the team in implementing a new solution.
- Develop new strategies and approaches to address new business problems and needs as they arise.
- Undertake a range of activities in the software development life cycle using a range of tools, techniques and programming languages to ensure customer requirements are met.

- Ensure application data integrity, availability, security and accessibility including the presentation and correlation of data in different formats.
- Engage project team members in the planning and completing of project activities and integrate those activities with other projects across site.
- Share information and actively participate in the IT wide project planning and activities as a team member.
- Motivate and enthuse others including the assessment and provision of constructive feedback on performance, as well as giving advice and guidance on ways of developing the skills, knowledge and experience of others.
- Build and maintain productive working relationships with all internal and external stakeholders to provide quality customer service, information, support and guidance in a professional, helpful and timely manner.
- Develop and maintain a thorough knowledge of best practice applications life-cycle methodology and to convert this knowledge into practical measures that can be adopted by ANSTO.
- Develop resource networks, and keep abreast of current issues that are likely to impact on function.
- Undertake additional duties as required and during periods of high work load or leave of other staff.

Decision Making

- The position is fully accountable for the accuracy, integrity and quality of the content of advice and the service provided to customers and other stakeholders, and is required to ensure that decisions are based on sound evidence, but at times may be required to make effective judgements under pressure or in the absence of complete information or expert advice.
- Determine key work priorities within the context of agreed work plans and will consult with the Development & Analytics manager on complex, sensitive and major issues that have a significant impact.

Key Challenges

- Managing a changing portfolio of applications.
- Being able to prioritise workloads and balance customer needs.
- Building and sustaining customer and vendor relationships over the long-term.
- Ensuring that regulatory driven applications are managed and maintained in accordance with regulators requirements.
- Working in a greenfield environment, with ever-changing developments in technology, plus evolving business requirements to meet.
