

BE AN EXPERT

WHAT IS THE ANSTO NATIONAL SCIENCE WEEK HACKATHON?

ANSTO's National Science Week Hackathon is a week long sprint for secondary school students to gain experience in science, innovation and entrepreneurship.

WHAT DOES BEING AN EXPERT INVOLVE?

Use your expertise of the Glass theme to guide students' thinking

Help students explore their thinking and help if they go off track

Offer advice on research topics or other experts to approach

Be available to answer questions from student teams via MS TEAMS chat

JULY 29th

Participate in an expert briefing session*

AUGUST 15th - 17th

Be available to answer student questions via MS TEAMS.**

AUGUST 19th

participate in the winner's announcement (online, optional)

*Time TBC. Will be recorded for future viewing. **no set time commitment, we ask that you check the MS TEAMS channel a few times a day for messages for you.

BENEFITS OF BEING A EXPERT

- Create connections with students and teachers who are passionate about STEM and innovation.
- Answer student questions at your own pace, with the option to involve other experts in your network
- Gain experience and knowledge from working with students from different abilities, ages, backgrounds and regions around Australia.
- Exposure during National Science Week for yourself and/or your organisation.

THEME: Glass: More Than Meets the Eye

Glass: More Than Meets the Eye will celebrate the many roles that glass plays in our lives – from phone screens to optical fibres to glassware in labs – plus investigating glass as a part of our sustainable future. In the true spirit of National Science Week, scientific development and innovation will be at the core of the theme.
